

Item	Item Description	Location
A	PCB Satelite Handle NiMH – Contains the ON/OFF and power level push buttons and charging LED.	Stick Body
B	PCB Current Limiter – Turns OFF the power to the nozzle if the brush motor current during BRC mode is too high.	Stick Body
C	BRC Switch PCB – Tact switch to activate the BRC mode.	Nozzle
D	PCB EMC PTC Nozzle NiMH BRC– Contains circuitry to dampen radiated emissions from the nozzle motor and a PTC for brush motor current.	Nozzle
E	PCB LED Nozzle – 4 LEDs and circuitry to supply a stable power to the LEDs.	Nozzle
F	PCB Main NiMH 12V BRC – Contains the processor and SW, motor control and battery charge and supervision circuitry.	Hand Unit
G	PCB Motor EMC Control - Contains circuitry to dampen radiated emissions from the fan motor.	Hand Unit
