

HORIZONTAL HANDLE INSERT FALLS OUT FROM THE ENV06 DOORS

The horizontal handle insert is fitted to the ENV06 doors.

Since the insert handle, due to quality problems, falls out from the doors, in the appliances listed in Tab. A, from the indicated serial no. A, some glue has been applied on the insert edges:

In case of claim due to the falling out of the insert, the Service Engineer must glue it as described above.

However, the glued insert can be replaced later.

The spare doors are delivered together with the insert previously glued by the factory (it is advisable, in any case, to verify that the insert does not detach easily from the door).

AFFECTED MODELS:
