Heating element 155 14 11 00/0 replaces heating elements 150 34 36 xxx

Replacement made by DP of the anc 150 34 36-xx
with the new heater currently used in production 155 14 11-xx.

The old heater had visible safety fuses.
The new heater is equipped with internal fuses.
The new heater has also a built-in NTC.
This is only used for fully electronic models.

**It is OK to use this also for old electro-mechanical models.
In this case the NTC is not connected.**
