

FIXING PROBLEMS CONCERNING FRONT PANELS

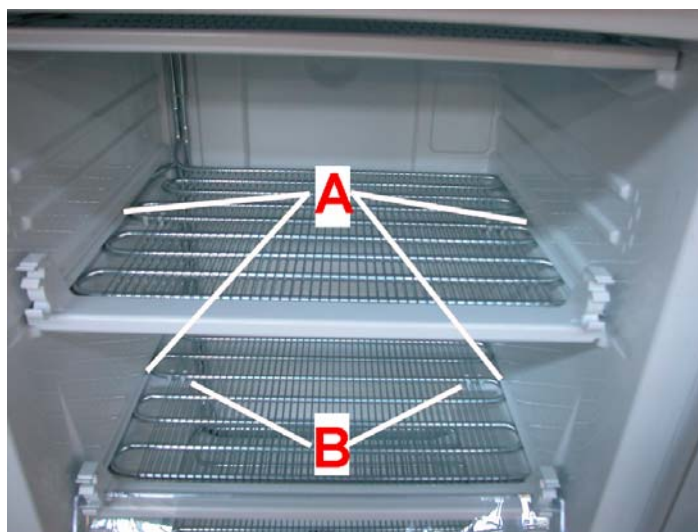

Up to serial no.725xxxxx, on the appliances listed in Tab. A, there might happen that the front panels could appear misaligned due to an excessive backlash when closing back the panel.

To improve the fixing of the front panels, it is necessary to use 4 trims (component A – fig. 1) and 2 evaporator stops (component B – fig. 1) and place them as shown in figure 2. The spare part nos. are listed hereafter.

Fitting procedure of the parts:

cd001897

a) Insert the side trims along the evaporator seat.

cd001898

b) Insert the trim to the point indicated by the arrow.

cd001899

c) Insert the evaporator stops in their seat in the compartment.
