

SERVICE BULLETIN

Hinge assemblies for heavy door panels

DESCRIPTION:

New door hinge assemblies are available - as a spare part only - to be used on both partially and fully built-in 60 cm dishwashers that are fitted with particularly heavy door panels. The weight of the panel can be between 7 kg and 11.5 kg.

The new kits contain single or double fulcrum compression hinges. They can be used on Dishwashers that use the

- hinge assembly old part no. 405 503 154/8 or 405 501 501/2 for the single fulcrum
- hinge assembly old part no. 405 505 045/6 or 405 507 653/5 for the double fulcrum.

Description	Characteristics	Weight of panel	Code
Hinge assembly for door opening to right/left	Single fulcrum	From 7 to 11.5 kg	405 506 794/8
Hinge assembly for door opening to right/left	Double fulcrum	From 7 to 11.5 kg	405 508 672/4

MODELS CONCERNED:

All PNCs/Models of 60 cm dishwashers that use the

- hinge assembly old part no. 405 503 154/8 or 405 501 501/2 for the single fulcrum
- hinge assembly old part no. 405 505 045/6 or 405 507 653/5 for the double fulcrum

SPARE PART NOS:

Notes for interchangeability:

The new hinge assemblies are perfectly interchangeable with the old ones. To change hinge assemblies, unfasten the 2 screws highlighted in the photo below, which fix the hinges to the upright.
