

REMOVING THE EARTHING PIN FROM THE REAR CASING ASSEMBLY

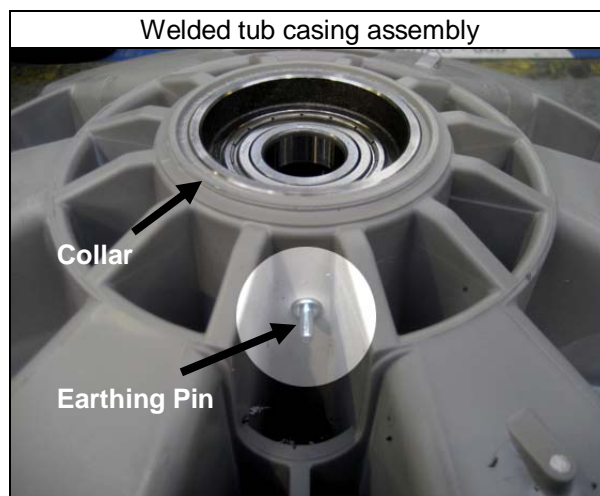

From Serial Number 950 xxxxx in all the rear casing assemblies, a collar has been created in the area around the hub and the earthing pin has been eliminated. As a result of this:

- the relevant wiring is removed and the plastic pulley is used.

SPARE PARTS CODES:

The rear casing assembly, complete with collar and earthing pin, is supplied as a spare part and can be used on all appliances, as shown in the diagram provided on the table in the paragraph "service information".

EN	Publication number	599 72 70-45	Rev. 00	02/2009	dmm
----	--------------------	---------------------	---------	---------	-----

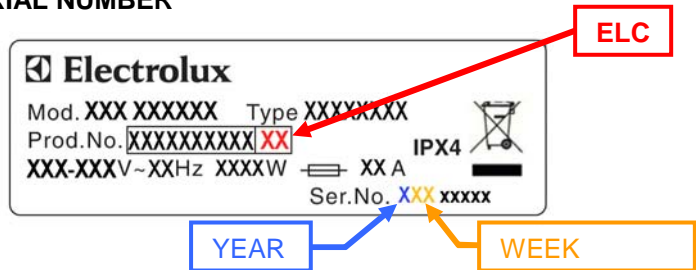

MODELS CONCERNED:

In production the models concerned will have a **new ELC** (see description of the serial number).

- Please check that the ELC corresponds to the spare parts list!
- Fitting the aluminium pulley is strictly prohibited in new appliances produced starting from Serial Number 950 xxxxx included, batches with ELC 00.

SERIAL NUMBER

ELC – last two figures after the PNC
YEAR last figure of the year of production
WEEK of production
