

MODELS : ESAM all models

SUBJECT : New chassis + new grounds container

Please be informed that, starting from **January 2011** and then progressively on all model / versions of ESAM, we have modified the chassis.

The **new chassis**, p/n **4055167284** is not singularly interchangeable with the **previous** one with p/n **4055173993**, because it fits a new modification for the water tank valve opening as well as a new coffee grounds container. So, in case you will have to replace the complete frame, **please check first, which the original one is:**

- in case is already the **new one**, you can just order the chassis p/n **4055167284**.
- if is the previous one, you will have to order previous one (p/n **4055173993**) if available.

If it is not, you will have to order the new chassis **4055167284**, and:

- silicon white ring code **4055174009**;
- 90° black tube to connect the exit of the water tank **4055174017**;
- new grounds container **4055174025**.

Old chassis p/n 4055173993

Old coffee ground container p/n 4071407235

Chassis with new modification: 4055167284

Ring: 4055174009

New coffee ground cont.: 4055174025
