

**CAPILLARY THERMOSTAT HOLDER REVISION**

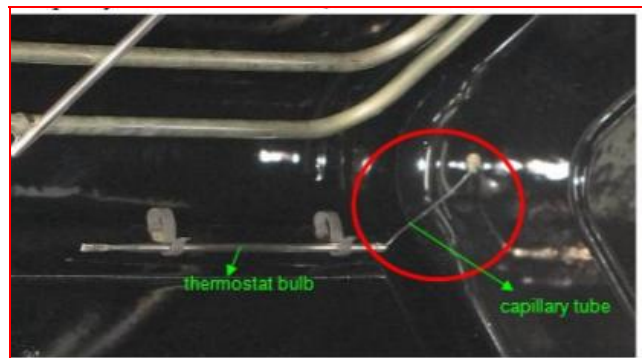

For all cookers (gas/electric); the capillary thermostat bulb holder has been changed after 24.11.2011 as an improvement modification. (Thermostat holder is well fixed on the cavity so that the stability of the thermostat bulb position is guaranteed even in the condition of vibration/ impact or etc..) and thus the thermostat sensibility will be guaranteed.

**PNC/Models involved:**

PNC	Model	PNC	Model	PNC	Model	PNC	Model
941309769	CMC604W	948905421	ZCV563DW	948905417	ZCV561DW	948905410	ZCG562FW
941309770	CEC606W	948905423	ZCV563DX	948905419	ZCV561DX	948905413	ZCG562FM
941309771	CVC609W	948905406	ZCG563FW	948905420	ZCV563DN	947760124	CMC605W
948905414	ZCE560DW	948905408	ZCG563FX	948905409	ZCG561FW	940002510	CMC605W

**Spare parts:**

Old thermostat holder	New thermostat holders
50289278009	for gas oven 4055174066
	for electric oven 4055174074

**Old thermostat holder 50289278009**

**New thermostat holder for gas oven 4055174066**

**New thermostat holder for electric oven 4055174074**

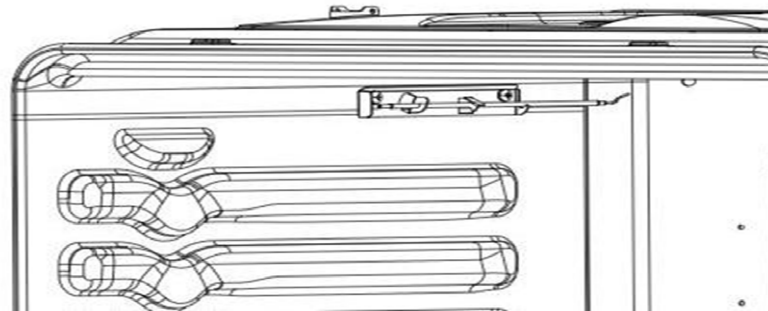

**CAPILLARY TUBES FOR THERMOSTATS  
(NO CHANGE)**

**CAPILLARY TUBES PLACED ON THE NEW HOLDERS**

Thermostat holder is well fixed on the cavity so that the stability of the thermostat bulb position is guaranteed (even in the condition of vibration/ impact or etc..) and thus the thermostat sensibility will be guaranteed.

**Note:** Pyrolytic ovens, Full touch , Visio touch (Okida display) and Electronic timer models have "electronic controlled thermostat" and thus they **will not be effected** of this revision.

Changing parts are **not interchangeable** because of:

1. Thermostat holders (due to the positioning holes are different from the current version)
  - Please **order old thermostat holder for old productions!**
2. Cavity (due to the new holes for thermostat holder)

Note: The old version cavity **will not be available** after this revision.

If you order old cavity, you will send the **new cavity with the new thermostat holder assembled on it.**
