

CCF REVISION CHANGE.

DESCRIPTION:

Poor drying performance of Tumble Dryer observed. Laundry not well dried even at "Cupboard dry" or when small quantity is loaded.

SOLUTION:

Software update shall be made by service. Current version of software can be found on label on Power Board.

CCF versions that will guarantee improved dryer performance are listed in the table:

Change:	HP MID 7kg	HP MID 8/9kg	HP TOP	Serial numbers affected up to:
1	136650043.005	136650023.021	136650031.005	141xxxxx
2	136650043.007	136650023.023	136650031.007	143xxxxx
3	136650043.009	136650023.025	136650031.009	147xxxxx
	Condense 10A	Condense 16A	Condense AUSTRALIA	Serial numbers affected up to:
1	136650016.017	136650009.028	136650051.001	135xxxxx
2	136650016.018	136650009.029	136650051.002	138xxxxx

Change 1 – improvement of starting humidity detection algorithm to eliminate low load detection problem; implemented on Cotton and Synthetics programs.

Change 2 – improvement of starting humidity detection algorithm to eliminate low load detection problem; implemented on all programs.

Change 3 – improvement of drying efficiency by spin speed increase from 54rpm to 55rpm (HP TD only)

MODELS INVOLVED:

All Sahara HP and Sahara TDC.
