

INTRODUCTION OF 'NEUTRAL' SPARE PARTS

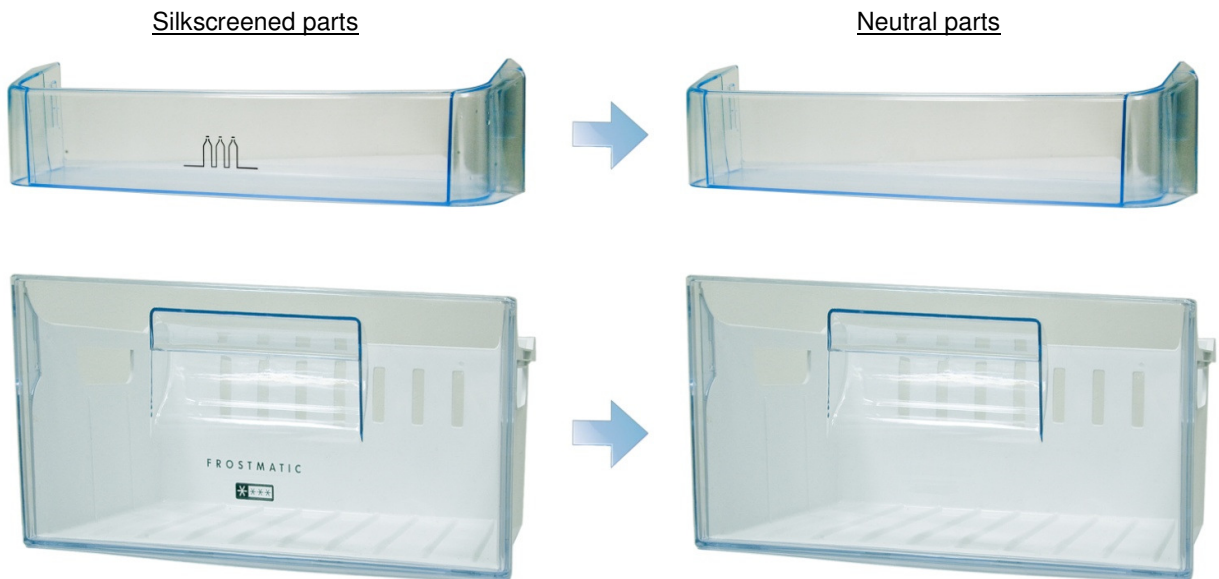

To reduce prices and complexity of certain spare parts and to limit their handling costs, Electrolux group has initiated a programme aiming at delivering only 'neutral' parts. This means that components received by customer will not have any visible markings, such as icons, drawings or descriptions. They will be fully compatible as far as material, dimensions, colour, transparency, and functionality is concerned.

The purpose of this service bulletin is to inform about this initiative and thus avoid customers returning spare parts, as they are visually different from what they have had installed in their appliances.

This concerns following group of parts:

- Freezer boxes
- Glass shelves
- Bottle shelves
- Vegetable boxes
- Butter shelves
- Door shelves
- Freezer flaps
- Fan covers
- Butter shelf lids

Below, examples of appearance changes:
