

Product: Microwave ovens manufactured by TEKA Portugal

Production dates: *Since W42/2012 – Introduction of Kepar Electronics*

Serial numbers: 242...

Description: New electronic controllers from electronics supplier KEPAR

Models Involved:

References Involved	Electronic Board
AEG => MCC3880E-m JOHN LEWIS => JLBIC02	4055117529
AEG => MCD3880E-m	4055046645
AEG => MCC3881E-m, MCC3885E-m HUSQVARNA => QCK5438 VOSS => IKC5700-RF PROGRESS => PBCM4500X PHILCO => PMDI32	4055111753
AEG => MCD3881E-m, MCD3885E-m	4055111787

Solution:

On the field the electronic boards from supplier CWJ can be replaced by Kepar electronics with all compatibility assured.

The equivalence between the temperature sensors connectors is the following:

Magnetron temperature sensor → Connector MAG

Cavity temperature sensor → Connector CAV

Interchangeability: *The electronic boards are totally interchangeable.*

Electronic board 4055111787

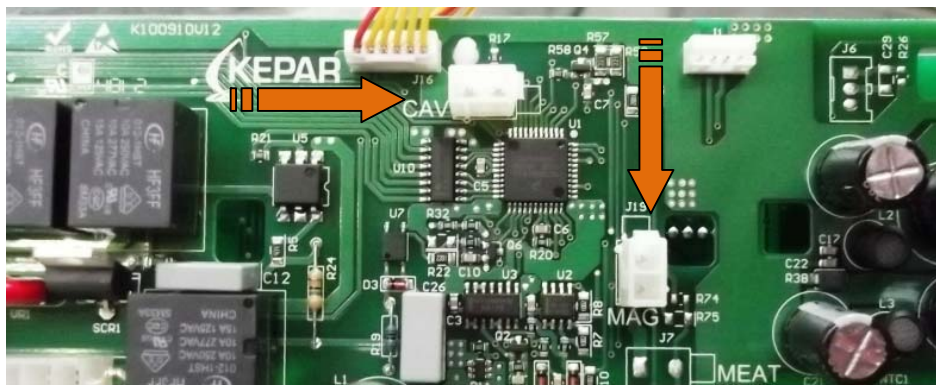

Magnetron temperature sensor 50299216007 (STM)→Connector MAG

Electronic board 4055117529 and 405511753

Magnetron temperature sensor 50299216007 (STM) →Connector MAG

Cavity temperature sensor 50299218003 (STC) →Connector CAV
