

END LED DOESN'T SHINE FOR APPLIANCES WITH ELECTRONIC EDW500**PROBLEM:**

Customers claim, that 'End' LED doesn't shine after a cycle.

SOLUTION

To investigate the functioning of the End LED, make the LED Test.
LED Test is a Service mode function to indicate if all used LEDs are working.

If all LEDs shine, the appliance works correctly.

The machine stays in End of Cycle mode for only 3min. After that, the machine automatically switched to **Standby** mode, in which all LEDs are turned off, leave only Power LED is on.

It could be a reason of claims that the End of Cycle mode is very short, comparing with the long drying phase and it could be overlooked.
