

GAS HOB - CONTINUOUS CLICKING ON CAST IGNITION SWITCHES

DESCRIPTION:

In case of continuous clicking of cast ignition switches, exchange the switch with new cast ignition switch, which is available as complete component. Other kind of service (like lubrication/repair) will not solve the issue.

SOLUTION:

- To replace the ignition switch (available only as a complete component) avoiding any lubrication/repair

Precaution

- To replace the ignition switches at any Service intervention, no matter the type of fault claimed by the consumer (i.e. If we service any affected PNC with the serial number from 801 to 834 to replace a faulty pan support, change the Ignition switch too); in case write with a permanent marker "CAST OK" beside the product rating plate

SPARE PART NUMBER:

Old spare part code	New spare part code	Description
3570571xxx	140054095xxx	Cast ignition switch

All the old stock of 140054095xxx is cleaned and if you order 140054095xxx you will receive the new spares.

QES CODE:

During the intervention please use work code 11 and:

Component	567
Defect	07

MODELS INVOLVED:

Gas Hobs: Serial number from 80100001 to 83499999 (see the list of PNC)

REVISION:
