

### NEW INTERNAL LAMP “LOW VOLTAGE”

#### DESCRIPTION:

Starting from December 2020 and with the introduction of the new main board PB500 (recognizable by the grounding connection as shown in the picture), the internal lamp is changed from “High Voltage” to “Low Voltage”. It means that the new low voltage lamp is driven by the power board, that permit to avoid current spikes that could overload the power supply.

it also allows to save energy and to align the appliances with the new European regulations and new Energy Label

1 – grounding connection

#### SOLUTION:

**With the new PB500 electronics, the interior lamp SWITCH OFF after 10 minutes (if the door remains open).**

“This is normal and not a fault on the machine”

To switch ON the light again:

- Press ON/OFF button
- Close and open the door again.

#### MODELS INVOLVED:

Dorotea            60cm  
Domodossola    45cm
