SOLUTION:

The Door has a tendency to sit lower than the control panel.

In order to raise the Door, a 0.5mm shim (Photo.1) will be fitted between the hinge and the hinge plate.
Loosen the top 2 Hinge screws. (Photo 2)
Insert the Shim into position as shown. (Photo 3 & 4)
Fully Tighten the top 2 Hinge screws. (Photo 5 & 6)
Check Door Alignment.
