

FREESTANDING COOKERS - GLASS LID HINGE BLOCKED/LOOSE**DESCRIPTION:**

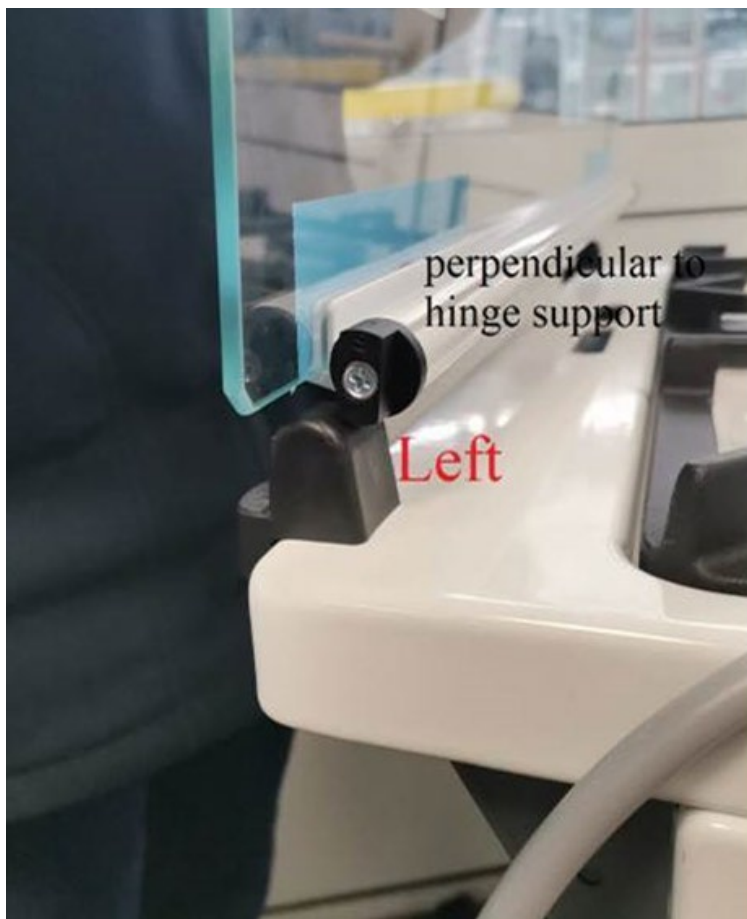

We received several claims where our customers claim that the glass lid hinges of FS Cookers are blocked/stuck, and the lid can't be opened or, by the contrary very loose and the lid falls back in open position. The issue might be caused by the wrong mounting of the hinges.

SOLUTION:

- a) Before mounting the new hinges, make sure to check symbols for left (**S**) and right (**D**) side printed on the surface as shown in the pictures below:

b) Mounting must be done with the lid in perpendicular position to the hinge support

b) Other recommendations:

- Do NOT apply tension on the lid in open/close position
- Installation of the product should be done by keeping distance between wall and back of the appliance
- Usage of extra lubricant

Following spare part to be used.
